NuVo Aesthetic & Wellness Consent Form for Acupuncture and Acupressure

Please read this information carefully and ask your acupuncture provider if there is anything that you do not understand.

What is acupuncture?

Acupuncture is a form of therapy in which fine needles are inserted into specific points on the body. Auriculotherapy involves inserting needles on one or both ears.

Is acupuncture safe?

Acupuncture is generally very safe. Serious side effects are very rare — fewer than 1 in 10,000 treatments.

Does acupuncture have side effects?

Yes, the common side effects of an acupuncture treatment are listed below.

- Drowsiness may occur after a treatment. If you are so affected, you are advised not to drive.
- Minor bleeding or bruising may occur when the needles are removed.
- Indwelling ear needles can become painful or inflamed. If this occurs, promptly remove the needle(s) involved.
- Symptoms can get worse after a treatment. Be sure to tell your doctor about this at your next appointment.
- Fainting may occur in certain patients, particularly at the first treatment.

In addition if there are particular risks that apply in your case, your doctor will discuss these with you.

Is there anything your doctor needs to know?

Apart from the usual medical details, it is important to tell your doctor

- if you have ever become faint or had a seizure,
- if you have a bleeding disorder,
- if you are taking anticoagulants or any other medication,
- if you have a damaged heart valve or other cardiac problem,
- if you have any other particular risk of infection.

Only single-use, sterile, disposable needles are used in the medical spa.
